Bill,

Just thought I'd take a minute to check in with you. Rumors have been flying around here over conservation group concern for potential delay in release of the Bristol Bay watershed assessment. It's hard to fathom any political reasons why EPA would be interested in that or acquiesce to someone else's desire for that.

Would appreciate a quick phone call on the subject if you have the time today. I have a number of meetings but will generally be around. 202-224-5728 is my direct.

BTW, thanks for the help last week on the two follow up items. I had a good conversation with Dan Opalski about coal ash. Haven't connected yet on the HCCP legal issues due to travel schedules. The ball is in my court to call back, anyway. Thanks again.

-MJ
